

Ex.No:2

Create Use Case, Activity, Sequence and Class Diagram

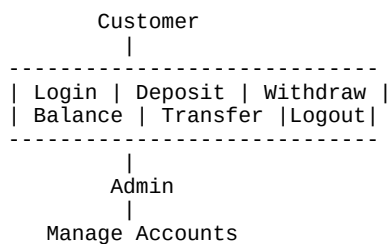

Project Title: Simple Banking System

AIM:

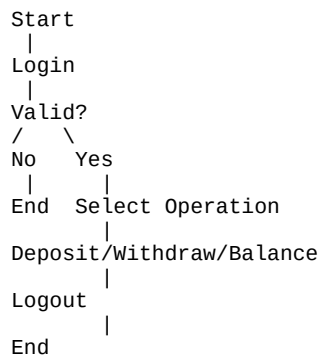

To draw Use Case, Activity, Sequence and Class diagrams for the Simple Banking System using UML in order to understand user activities, system behavior, object interactions and structural design.

USE CASE DIAGRAM:

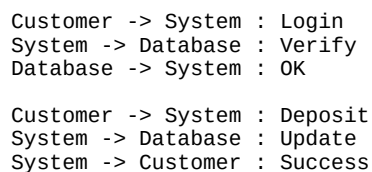

A Use Case Diagram represents interaction between actors and the banking system. It includes operations like account creation, deposit and withdrawal.

ACTIVITY DIAGRAM:

SEQUENCE DIAGRAM:

CLASS DIAGRAM:

```
-----
customerId
name
-----
login()

Account
-----
accountNumber
balance
-----
deposit()
withdraw()

Transaction
-----
transactionId
amount
-----
record()
```

RESULT:

Thus the UML diagrams for Simple Banking System were created successfully.
